

# REGISTRATION OF INTEREST

## Electricity Network Construction Projects

Western Power is seeking registrations of interest from suitably qualified and experienced companies capable of delivering all or part of the works under its Preferred Vendor Network Construction Project Services panel.

### Work under the panel would include:

- Overhead line construction including construction, installation and removal of transmission and distribution electrical powerlines, cables and associated structures and equipment, switching, permits, customer outage notifications, testing and commissioning
- Underground construction including construction, installation and removal of transmission and distribution underground electrical powerlines, cables and associated structures and equipment, HV/LV jointing, terminations, switching permits, customer outage notifications, testing and commissioning
- Civil construction including foundations, cable trenching, steel structures, earthworks, access roads, drainage and sewerage structures, block and tilt-up panel concrete walls, buildings and extensions
- Electrical works including fit out of primary plant, switchrooms, substations, relay and control rooms, lighting, earthing, primary and secondary cables and conduits

To be considered for the inclusion in a Request for Proposal (RFP), please REGISTER your interest on the Western Power website by 22 January 2018 at:

[westernpower.com.au/services/suppliers-materials/becoming-a-supplier/](http://westernpower.com.au/services/suppliers-materials/becoming-a-supplier/) and include the following details:

- Brief description of areas of expertise relevant to the above
- Geographical area within the South West Interconnected Network you are prepared to work in
- Reason for Registration: Please select 'in response to an advertised bid' and
- Title of the procurement event: WS1210576981 – Electricity Network Construction Projects
